Road Trip: Dodge Challenger Hellcat Widebody

For our Road Trip project in American Truck Simulator, we continue to expand a growing collection of legendary vehicles that feel perfectly at home cruising endless highways and scenic byways across America. Today, we're excited to share a work-in-progress look at the 2023 Dodge Challenger SRT Hellcat Widebody, one of the most iconic American muscle cars of modern times.

Few vehicles represent contemporary American muscle quite like the Challenger. The Hellcat Widebody stands as a bold statement from an era when muscle cars reached new heights of power, presence, and character, while still paying homage to the unmistakable design language that defined generations before it. It is already regarded as a modern legend, a car that proudly carries the spirit of American performance into the present day.

The Dodge Challenger has always been about more than numbers on paper. It's about attitude, confidence, and the feeling of pointing a long hood toward the horizon. The

Hellcat amplifies all of that with its aggressive stance, widened bodywork, and unmistakable road presence.

In Road Trip, this vehicle is about experiencing the vastness of North America from behind the wheel of an automotive icon, cruising historic highways, rolling through small towns, and stopping to admire the diverse landscapes and landmarks that define each state. This is the kind of car meant for memorable journeys, where the drive itself is just as important as the destination.

With every new Road Trip vehicle, our team continues to raise the bar for visual fidelity, and the Dodge Challenger Hellcat Widebody is no exception. From the muscular exterior proportions to carefully crafted interior details, our vehicle artists are paying close attention to materials, lighting, and overall authenticity to ensure the car feels believable and immersive within the world of American Truck Simulator.

Hi I can't wait for American truck sim to release date on my Xbox series X console version. And I can't wait for road trip mode on American truck sim so I can explore the all the cities on the full radar maps and experience the full American drive just similar to the crew 2 maps but bigger with SCS software version of full America.

Hello. Finally, a car that, if released as a DLC, will definitely be a Dodge in the relevant ATS garages. This car is a bit of a hobby, and I'm sure I can't wait to finally add it not only to my truck garage but also to every garage I can get my hands on in the game. From now on, I'll be waiting patiently for this DLC to finally show off some great runs. Wow!

trucks ,also the roads are so large that driving a car will feel not realistic at all.

You're just talking nonsense, they are updating the physics quite a lot of these vehicles, and the trucks don't really feel like "bricks" unless YOU set them up that way.

Hey are the physics going to be the same arcade ones the game already has, or are you going to implement realistic vehicle physics? Or are you just going to make excuses, like you did back when you were working on American Arcade sim claiming that "Dad" wouldn't let you add smoke effects to the exhaust pipes because it would "ruin the American Arcade atmosphere"?
